PROFESSIONAL SUMMARY

Frontend Developer with strong hands-on experience in React.js, HTML5, CSS3, JavaScript, & Tailwind CSS, focused on building responsive, user-friendly web interfaces. Experienced in developing real-world projects including SaaS dashboards, e-commerce platforms. Familiar with Node.js, Express, Firebase, and Firestore, and actively progressing toward full-stack development. Passionate about clean code, UI/UX optimization, and continuous learning.

PROJECT EXPERIENCE

SaaS Invoicing System (React + Firebase)

- Built a SaaS-based invoicing application using React.js and Firebase
- Implemented customer management, estimate-to-invoice conversion, and business reporting features
- Designed a clean, responsive UI focused on usability and performance

LuminaAI – AI Chatbot Application

- Developed an AI chatbot using custom messages design inspired by ChatGPT
- Integrated conversational UI with API-based responses
- Focused on user experience, response handling, and frontend architecture

React.js E-Commerce Website

- Created a fully interactive multi-page e-commerce application using React.js
- Implemented product listings, navigation, and dynamic UI components
- Ensured responsive design across desktop and mobile devices

EDUCATION
